Studies in Educational Evaluation

www.elsevier.nl/stueduc

SUBJECT INDEX

Accountability, schools 96, 104
Advanced mathematics, Germany 4, 65–78
Age, maths performance 20–21
Archival materials, educational renewal project evaluation 139–143
Artists, short-term educational programs 108–109, 115–116
Assessment *see* Evaluation
Attitudes
  South African maths students 21
  student ratings interpretation 291–305

Belief systems, mathematical world views 4, 65–78
Burnout syndrome, teacher self-concept evaluation scale 239–255

Carnegie Hall LinkUP! program 108–125
The Central Council for Education 175
Classroom assessments 107–131
Co-assessment 316–318
Cognitive determinants, academic achievement 65–67
Cognitive structures, science students 257–268
Collaboration, educational renewal projects 133–151
Communication
  internal/external school evaluation 101–104
  skills, peer assessment in problem-based learning 161
Comparative studies 1–93, 332–337
Conceptual level, internal/external evaluation 101
Consultation, student ratings interpretation 291–305
Course evaluation
  educational programs 107–131, 355–372
  educational renewal projects 133–151
  short-term educational programs 107–131
  student ratings interpretation 296–301
  technical training effectiveness 269–290
Curriculum, intended/implemented 2, 28, 86–90

Data *see* Research data
Designing assessment instruments 107–131
Developing countries, maths literacy 7–25

Dialogue evaluation
  internal/external school evaluation 101–104
  methodology 101, 102
Dropouts 341–354
Dutch National Educational Council 200

Early school leavers 341–354
Educational priorities policy (EPP) 342
Educational program evaluation 107–131, 355–372
Educational renewal projects 133–151
Educational systems, Switzerland 48–50
Edumetrics 307–329
Emotional exhaustion, teachers 239–255
Empirical covariance matrix 78
Expression skills 186–187
External school evaluation 95–106

Feedback, student ratings interpretation 291–305
Final year students, maths/science literacy 7–25, 27–46
Flow map methods 257–268
Focus groups, educational renewal project evaluation 138, 143–145
Formative evaluation 291
France, school performance indicators 199, 200

Gender differences
  maths/science literacy 35–37, 43
  peer consultation 301–302
  TIMSS mathematics achievement 331–340
Germany, mathematical world views 4, 65–78
Group work, peer assessment in problem-based learning 153–173

Heteroscedasticity, maths students 18
Higher vocational education, peer assessment in problem-based learning 163–168
Human Sciences Research Council (HSRC) 9

IEA *see* International Association for the Evaluation of Educational Achievement
Information processing, science students' cognitive structures 264

Instructional improvement 291–305
Internal school evaluation 95–106
International Association for the Evaluation of Educational Achievement (IEA) 1, 27, 28, 332
International studies, maths/science literacy 1–93, 332–337
Israel, school evaluation 99–100

Japan, problem-based learning evaluation 175–198
Judgment skills 184–186
Judgment-oriented evaluation practice 224–225, 231, 232–233

LinkUP! program (Carnegie Hall) 108–125
Literacy assessments
  The Netherlands 27–46
  science/maths students 1–93
  South Africa 3, 7–25
  Switzerland 3, 4, 47–64

Maslach Burnout Inventory (MBI) 242
Mathematical world views (MWV) 4, 65–78
Mathematics, gender differences in achievement 331–340
Mathematics Literacy Score (SCORE) 16–18, 19
Mathematics and science literacy (MSL) 2
  The Netherlands 27–46
  South Africa 7–25
  Switzerland 3, 4, 54–56
MBI *see* Maslach Burnout Inventory
Meta-listening techniques 257–268
MSL *see* Mathematics and science literacy
Multi-collinearity, maths students 18
Multi-faceted educational renewal projects 133–151
Music teaching evaluation 107–131
MWV *see* Mathematical world views

The Netherlands
  early school leavers 341–354
  maths/science literacy 27–46, 79–94
  school performance indicators 200–201

OAT *see* OverAll Test
Opportunity to learn variable 42, 44, 87
OverAll Test (OAT) 312–314

Partnerships, educational renewal projects 133–151
Path analysis, mathematical world views versus achievement 4, 70–71
Peer assessment 153–173, 315–316
Peer consultants, student ratings interpretation 296–301
Performance indicators, public schools 199–214
Plausible values techniques 69
Policymakers, early school leavers 342–343
Political-ethical problems, school performance indicators 205–206, 209–210
Portfolio assessment 310–312
Problem-based learning 153–173, 175–198
Process-oriented evaluation practice 228–230, 231
Programs *see* Educational programs
Public school performance indicators 199–214

Quality assurance, program evaluation 355–372
Questionnaires
  educational renewal project evaluation 138, 145
  mathematical world views versus achievement 77
  peer assessment in problem-based learning 161, 162, 169
  problem-based learning evaluation 177
  student ratings interpretation 291–305
  student-oriented evaluation systems 362–364
  teacher self-concept evaluation 241, 245

Ratings
  assessment criteria 307–329
  interpretation 291–305
  peer assessment 154–155, 157–159, 164–165, 170
Regression analysis 15–18
Reliability related assessment issues 320–321
Renewal projects 133–151
Research data
  educational renewal project evaluation 135–147
  gender in mathematics achievement 332–336
  maths literacy 15–18, 25
  peer assessment in problem-based learning 155–168
  problem-based learning evaluation 177–193
  science students' cognitive structures 258–265
  short-term educational programs effectiveness 118–124
  student ratings interpretation 296–301
  teacher self-concept evaluation scale 241–248
  teachers' evaluation practice 221–232
  technical training effectiveness 273–286
  TIMSS 2, 3, 15–18, 50–52
Responsibility for action, school evaluation consequences 103–104

Sampling
  educational renewal projects evaluation 136–138

maths/science literacy 29–30, 50–52, 58
problem-based learning evaluation 178
School accountability 96, 104
School career 42, 44
School evaluation, internal/external 95–106, 199–214
School leavers 341–354
School performance indicators (SPIs) 199–214
Science literacy *see* Mathematics and science literacy
Science study, cognitive structures 257–268
Science-Technology-Society (STS) 68
SCORE *see* Mathematics Literacy Score
Scoring guides, short-term musical educational programs 109–118, 126
Self-assessment
schools 95–106
students 154, 314–315
Self-concept, teachers 239–255
Sex *see* Gender
Short-term educational programs 107–131
Societal problems, school performance indicators 205–206, 209–210
Socioeconomic status, South African maths students 19
Solution-oriented evaluation practice 225–228, 231
South Africa, maths literacy 2, 3, 7–25
SPIs *see* School performance indicators
Staff development, student ratings interpretation 296–301
Statistics *see* research data
Stepwise regression analysis 17–18
STS *see* Science-Technology-Society
Student-oriented evaluation systems 355–372
Summative evaluation 291
Switzerland, scientific literacy, upper-secondary students 3, 4, 47–64

Teacher Irrational Belief Scale 243
Teacher Self-Concept Evaluation Scale (TSCES) 239–255
Teaching practices 215–238, 296–301
Technical training 269–290
Technical-analytical problems, school performance indicators 202–204, 207
Thinking skills 181–184
Third International Mathematics and Science Study (TIMSS) 1–93
gender difference 331–340
Germany 65–78
The Netherlands 3, 79–94
South Africa 7–25
Switzerland 47–64
Thirty Townships Project (Nevo & Friedman, 1999) 99, 100
TIMSS *see* Third International Mathematics and Science Study
Track-grades anchoring, Dutch maths/science literacy 35–43
TSCES *see* Teacher Self-Concept Evaluation Scale

Unemployment, early school leavers 349–352
United States, science literacy 60
University setting
educational renewal projects 133–135
peer assessment in problem-based learning 155–163
Upper-secondary students, Switzerland 47–64
Usability problems, school performance indicators 204–205, 208–209

Validity related assessment issues 318–319
Vocational programs
Switzerland 51, 53, 54, 55–56, 58
technical training 269–290

World views, mathematical 4, 65–78
Written student evaluation tests 216–219, 223–230, 232
